Connecting to the Wireless Network with a Macintosh
Using System OS X 10.5 or higher
(We are working on ways to connect with OS X 10.4 and earlier)

1. Go to the Apple Menu (upper left corner) and choose “System Preferences”

2. Under “Internet & Wireless” choose “Network”.

3. Under “Network” click on “AirPort”. If Airport is off, click on the “Turn AirPort On” button.

2. When the “Authenticating to network “BSCWireless” window pops up, enter your BSC Network ID and password. You must have a BSC Network ID and Password to use the wireless system.
