

MacBook Wireless Settings

On your MacBook, look in the upper left-hand corner for the Wi-Fi symbol beside the battery symbol and the magnifying glass. Click on the Wi-Fi symbol.

Once you have clicked on the Wi-Fi symbol, you will see a drop-down menu. Find the tab labeled **Other Networks**. Click on Other Networks and look for the Wi-Fi table labeled **BSUWireless**. Click on BSUWireless.

From here, you will see a place to type in an account name and a password. The account name will be the beginning part of your student email. The password will be the same password you use to sign into your myBSU. Once you have typed this information in, click OK.
