

iPhone Wireless Settings

To set up the Wi-Fi on your iPhone, open the settings app and locate the Wi-Fi tab under airplane mode.

Once you have clicked on the Wi-Fi tab, look for the name **BSUWireless**. Once you have located this, tap on it.

Once you have clicked on the name, fill in the designated areas with the following credentials including your username, which is the beginning part of your student email, and then your password, which is the same password you would use to log into myBSU. Once you have filled in these fields, tap join.
