

Faculty Awards & Criteria Ideas

Academic Advising

The purpose of this award is to recognize faculty who have excelled in providing academic advising to undergraduate and/or graduate students. This award seeks to recognize academic advising for student success that represents service beyond faculty professional responsibilities (i.e., contributions that go beyond traditional advising expectations or otherwise enhance advising at IUP). A clear description of how “student success/outcomes” are defined and supported must be provided. Applicants for this category do not need to provide a course syllabus.

Innovation

This award recognizes the use of techniques, methods, materials, technologies, or tools outside traditional teaching practices for such purposes as increasing student engagement, enhancing student retention, demonstrating difficult concepts, or encouraging critical thinking. Exemplary applicants will provide the pedagogical rationale for the application of the approaches employed, confirmation of the outcomes achieved, and clear evidence of the innovation aspect of the class.

Excellence in Teaching

Excellence in Research and Scholarship

Outstanding New Instructor

This award recognizes an instructor who demonstrates excellence in teaching in the first two years at BSU, stimulates interest in the material, motivates students, and promotes student learning.

Distinguished Staff Award
